Service Links Student Data to Web College Planning Platform

3/26/2007

By Paul McCloskey

ConnectEdu Inc., a Web-based college planning service, and Rediker Software Inc., a school student management system, have teamed to export student data directly into the college planning, admissions, and financial aid platform. The partners claim

the result will integrate high school systems with community colleges, colleges, and universities, as well as provide entirely electronic college transcripts and application materials.

ConnectEdu claims it is now the only XML-based transcript delivery system directly integrated with a secure national network of colleges that follows the guidelines of the Post Secondary Education Standards Council (PESC) and the Schools Interoperability Framework Association (SIFA).

The first said that by delivering documents digitally, GPA recalculation, applicant matching, and receipt verification can be done instantly.

As a result, admissions

Coming Soon: 2007 Campus Technology Innovators

You're doing great things with technology on campus—we want to know about them. We seek exemplary colleges and universities, their visionary technology project leadership, and their innovative vendor partners who have deployed extraordinary campus technology solutions to campus challenges.

NEC Debuts 5,000-Lumen DLP Projector

NEC Corp. has debuted a new model in its NP series of DLP-based projectors: the NP4000. The new model is an installation and large-venue projector targeted toward government, higher education and corporate applications. It made its first public appearance at the NSCA Expo 2007 in Orlando, FL.

Sony To Launch 4k Projector This Summer

Sony will expand its lineup of 4k projectors this summer with the launch of its new SRX-R210 cinema projector, which will be added to the company's SRXD family of high-end projection systems for theaters.

To Each His Own ... Laptop

It was only in the last couple of years that the number of laptops shipped annually exceeded the number of desktops. I can still remember the thrilling moment when my boss agreed that it would be a "good thing" if we began moving most of our professional staff from desktops to laptops.

offices would spend less time manually processing college applications, would increase their relationships with college-bound students, and ultimately would deliver more timely admissions decisions.

ConnectEdu said it expects to deliver 1.3 million transcripts in the upcoming admissions cycle.
