

AdminPlus

A Complete Student Information System that Handles All of Your Needs

AdminPlus, the latest version of Administrator's Plus®, is a cloud-based student information system that streamlines data management with its ease-of-use and innovative features. Developed by educators for educators, AdminPlus has been the trusted choice in school administrative software by thousands of schools for more than 35 years.

Designed to Meet Your School's Specific Needs

AdminPlus offers a flexible, multi-feature design that creates a seamless flow of data throughout your school. Integrated solutions include:

- Data Base
- Attendance
- Report Cards
- Scheduling
- Discipline
- Student Billing
- Pictures Plus ID Cards
- Electronic Portfolios
- Online Forms
- SMS Notification
- Mobile Apps
- TeacherPlus Gradebook
- StudentPlus Web Portal
- ParentPlus Web Portal

Unmatched Customer Service and Support

At Rediker Software, outstanding customer service and support are a top priority. When you purchase AdminPlus, you don't just become a customer, you join the Rediker Software family. We are always available to assist you and you can always reach the right person. Unlike some other SIS companies, we provide support as often as needed to anyone at your school. Our knowledgeable technical support team is patient and will work with you closely until all of your questions are answered.

Administrator's Plus is the most comprehensive, all-in-one, school information system on the market. Having worked with a multitude of other SIS platforms in the past, I have found that AdminPlus has them beat. I highly recommend any school evaluating SIS platforms to call Rediker Software for information and to schedule a demo."

Stuart Miller, IT Director
Tampa Catholic High School, Tampa, FL

The AdminPlus Difference

Flexibility and Control of Your Data

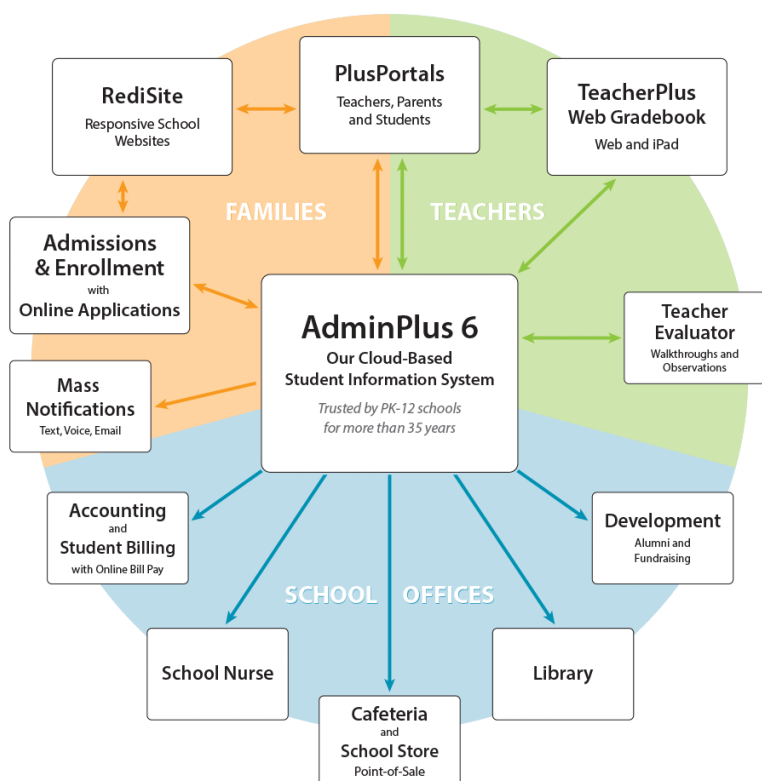

AdminPlus is customizable to meet your school's unique needs. We let you decide what data to store and we make it easy to track. While our software includes hundreds of built-in reports, our intuitive report writers allow you to create your own or edit pre-existing reports. We also believe that your data is your own, so we make it simple to export data to Excel™ or share data with other SIF compliant products.

Student and Staff Data Always at Your Fingertips

Access to critical data at a moment's notice is key for schools. AP Cloud Services delivers your AdminPlus data over the web, enabling you to access student and staff information at school, home, on your mobile device or tablet.

Create a Complete School Management Solution

Because our school management software system is fully integrated, data is easily accessible throughout your school. At the center is our AdminPlus Student Information System. Our integrated web gradebook and portals for parents and students connect your school with the community.

Integrated Solutions Include:

- Demographics and Contact Database
- Daily and Period Attendance
