

# AdminPlus Mobile App

Student and Staff Data Anywhere, Anytime.

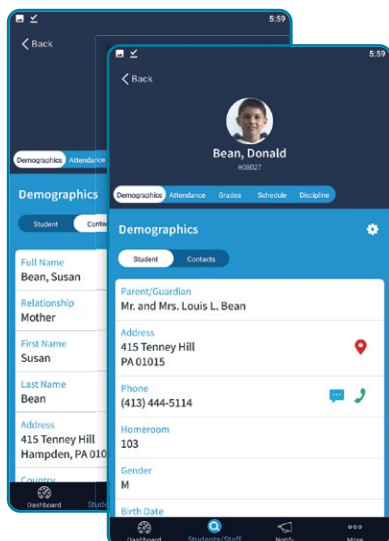

## The New AdminPlus Mobile App

Access student and staff data, attendance, grades, schedules and more on iOS and Android devices.

Rediker Software's new **AdminPlus Mobile App** for iOS and Android brings your AdminPlus data onto your favorite mobile device, so you have important student information at your fingertips.

- ✓ Secure, two-factor authentication (2FA)
- ✓ No device syncing required
- ✓ Switch between schools within the app
- ✓ Filter through student and staff data
- ✓ Quickly call, email or text parent contacts
- ✓ On-the-spot attendance and schedule lookup

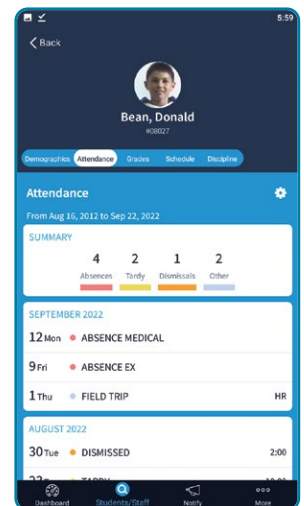

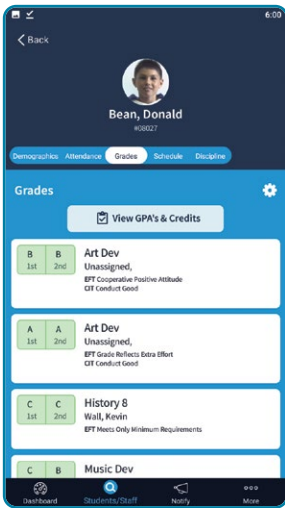

## Demographics

View **Student Demographics** and **Contacts**. Quickly lookup parent contact info in the event of an emergency.

## Attendance

See when a student is absent or tardy. Select a custom date range. View summary totals and the list of events.

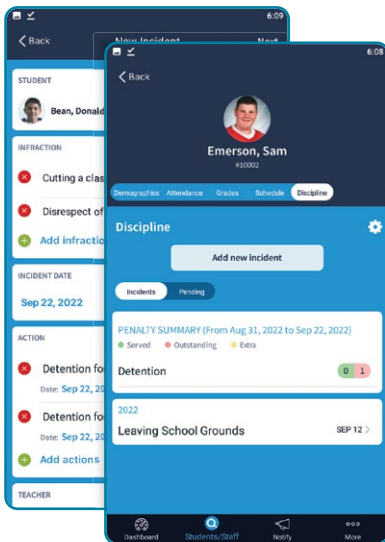

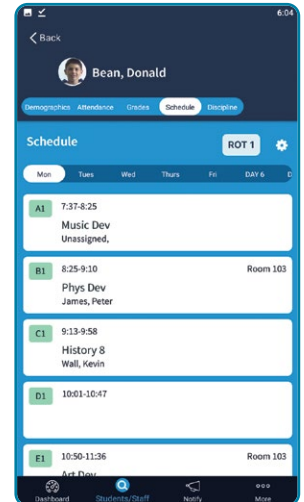

## ◀ Grades

Assess how a student is performing by viewing their grades. See grades, skills, and GPAs. Selected marking period grades, course name, teacher and comments are displayed. Selecting a class will display additional marking period grades.

## Student Schedules ▶

Know what class a student is scheduled to be in at any time. Display block names, times, and teacher name. An important security feature, the mobile app highlights the class the student should be in during the current period. Use settings to choose rotation and section terms.

## ◀ Discipline and Incident Reporting

View previous infraction details and add new incidents while at the scene. The penalty summary shows only the "penalty" with a total for Served or Outstanding for the date range, followed by a list of incidents.

## Notifications with AP Notify ▶

AP Notify features are now included in the AdminPlus mobile app. Quickly notify thousands of contacts within your school community via email, text and voice message, without having to import data.

Note: requires AP Notify as part of the AdminPlus SIS.
